[What is Central Air Conditioning? \(with pictures\)](#)

Central air conditioning is a method of structural cooling in which a centralized unit cools and dehumidifies air before circulating it throughout a building. This is in direct contrast with systems that rely on individual units in rooms or suites of rooms. Central air, as it is also known, is often [Best Central Air Conditioner 2018 - Brand Reviews and Ratings](#)

The Best Central Air Conditioning Units of 2018 Since 2013, spent over 100 hours researching and evaluating the top central air conditioner brands in the industry.

[2019 Cost To Install Central Air | Central Heat & Air Cost ...](#)

Central air and heating systems use a series of ducts to circulate cool air or heat throughout the home. Quickly becoming the standard for cooling or heating a home, central air and heat are usually added as part of a combined heating, ventilation and air conditioning system, or HVAC. [What's the Difference Between Forced Air and Central Air ...](#)

A central air-conditioning system uses the forced-air system within your home to deliver cooled air, making use of the vents, plenums, and ducts to provide conditioned air. It is independent from your furnace, using an outdoor unit that is not connected to the furnace at all, but basically borrows the delivery system.

Looking for parts for your Carrier Central Air Conditioner? RepairClinic.com has the appliance parts, lawn equipment parts and heating/cooling parts you need!

Air Conditioning Your Home | Natural Resources Canada

Certain central air-conditioning systems are specifically designed for houses without air distribution systems. These systems utilize small-diameter air ducts that lend themselves to retrofit installation in walls, ceilings and floors. The small ducts require a special high-pressure air distribution fan to overcome their large pressure drop.
