[Central Heating and Cooling Systems - AHRI](#)

Central Heating and Cooling Systems When it comes to saving on your utility bills, a great place to start is learning the most you can about your heating, ventilating, and air conditioning (HVAC) system.

HEAT RECOVERY FROM CHILLED WATER SYSTEMS

HVAC system perspective [1] (Fig. 2). Understanding the appropriate hot water temperature needs for building heating purposes is important. Most reheat and building heat applications do not need 130 to 140 F to perform satisfactorily. As discussed later in this paper, operating the reclaim chiller at higher leaving condenser water

temperature (LCWT) increases lift and reduces chiller plant
