Propane vs Gas Generators: What to Consider | Backdoor ...

Liquid Propane Gas is different from natural gas which is comprised mostly of methane and difficult to store as a liquid. The problem with LPG is not usually the gas but the regulator. As a gas, LPG freezes, but it does so at some ungodly temperature of -306.4 F.

Propane, Niagara, Heating, Hot Water, Propane Tank ...

Propane is an odourless gas to which an odourant has been added to detect leaks. Liquid propane boils (from liquid to vapour) at -44F (-42.2C). At one and a half times the weight of air, propane gas will settle in low areas.

Propane - Wikipedia

Propane (*propane*) is a three-carbon alkane with the molecular formula C₃H₈. It is a gas at standard temperature and pressure, but compressible to a transportable liquid.

What Is the Difference Between Propane and Natural Gas?

Propane provides more energy per unit of volume than does natural gas. While propane is usually measured in gallons (or liters), natural gas is found in cubic feet (or cubic meters). Heat is measured in British Thermal Units (BTUs), which is the amount of heat needed to increase the temperature of 1
