Air Flow, Air Systems, Pressure, and Fan Performance

In HVAC system the plenum is a duct. Total Pressure, Consists of the pressure the air exerts in the direction of flow (Velocity Pressure) plus the pressure air exerts perpendicular to the plenum or container through which the air moves. In other words: P T = P V + P S. P T = Total Pressure, P V = Velocity Pressure, P S = Static Pressure. This general rule is used to derive what is called Symptoms of a Bad or Failing AC Pressure Switch ...

The AC pressure switch is a safety switch that is mounted on both the high and low sides of the air conditioning system. It monitors the pressure of the refrigerant on its respective side of the system. There is a high side pressure switch, and low side pressure switch, and they both serve to monitor the system for pressure faults that can damage the compressor.
