[REGRESSION \(Social Science\) - what-when-how](#)
Regression is a broad class of statistical models that is the
foundation of data analysis and inference in the social
sciences. Moreover, many contemporary statistical
methods derive from the linear regression model. At its
heart, regression describes systematic relationships
between one or more predictor variables with (typically)
one outcome.

[Regression Analysis - POPULAR SOCIAL SCIENCE](#)
Regression analysis is the work horse of the social
sciences, and a tool every student should have at least
some knowledge about. It allows the researcher to include
several variables in the same model, a so-called
multivariate analysis.
