The serpentine belt was designed to replace the multi belt drive belt systems and control multiple components on your engine with a single belt. The single belt is more efficient, easy to change and has a longer life span than the multiple belt systems used in earlier model vehicles.

Serpentine belt - Wikipedia

A serpentine belt is a single, continuous belt used to drive multiple peripheral devices in an automotive engine, such as an alternator, power steering pump, water pump, air conditioning compressor, air pump, etc. The belt may also be guided by an idler pulley and/or a belt tensioner (which may be spring-loaded, hydraulic, or manual).
