Sources and Solutions: Stormwater | Nutrient Pollution ...

Water from rain or snow storms, known as stormwater, instead flows over streets, parking lots and roofs and into a water body or storm drain. Stormwater runoff is often worsened by human activities, and can contain nitrogen and phosphorus pollutants from fertilizers, pet and yard waste.

Stormwater - Wikipedia

Stormwater, also spelled storm water, is water that originates during precipitation events and snow/ice melt. Stormwater can soak into the soil (infiltrate), be held on the surface and evaporate, or runoff and end up in nearby streams, rivers, or other water bodies ( surface water ). Stormwater pollution | NSW Environment & Heritage Stormwater pollution can kill plants and animals that live in the water. For example: For example: sediment in the water reduces light penetration and affects photosynthesis, the process that allows plants to use light as their source of energy

Sample PPP - Iowa Department of Transportation Requirements, Non-Storm Water Controls, Potential Sources of Off Right-of-Way Pollution, and Definitions. This plan references other documents rather than repeating the information contained in the documents.

Storm Water Requirements - Storm Water Permits The Clean Water Act Amendments of 1987 established the NPDES storm water program. The act called for implementation in two phases: Phase I addressed the most significant sources of pollution in storm water runoff. Phase II addresses other sources to protect water quality. The Phase II regulations
