[What is Science Page - Understanding Science](#)
Science is both a body of knowledge and a process. In school, science may sometimes seem like a collection of isolated and static facts listed in a textbook, but that's only a small part of the story.

[Science definition - What is science? - Science Made Easy](#)

Science as defined above is sometimes called pure science to differentiate it from applied science, which is the application of research to human needs. What is a Scientist? A scientist is a person who works in and has expert knowledge of a particular field of science.

[Science - Wikipedia](#)

Science (from Latin scientia, meaning "knowledge") is a systematic enterprise that builds and organizes knowledge in the form of testable explanations and predictions about the universe.

[What is represented by "%0d" and "%0a" in HTML query ...](#)

%0d is the carriage return character, and %0a is the linefeed character. In DOS and Windows, the end of each line in a text file has %0d%0a. In UNIX, the end of each line in a text file has just %0a. These are often called "DOS linefeed" and "Unix linefeed", or "DOS EOL" and "UNIX EOL" (End Of Line).

[What is Science? - University of Georgia](#)

What is science? Science is the concerted human effort to understand, or to understand better, the history of the natural world and how the natural world works, with observable physical evidence as the basis of that understanding 1.

[What is science? :: NASA Space Place](#)

Science is curiosity in thoughtful action about the world and how it behaves. Anyone can have an idea about how nature works. Some people think their idea is correct because "it seems right" or "it makes sense." But for a scientist (who could be you!), this is not enough. A scientist will test the
